

Web3 Engineer with 2+ years of experience building production-ready smart contracts and decentralized applications across EVM and Solana ecosystems. Experienced in Solidity, Rust, protocol development, and blockchain infrastructure, with a strong focus on DeFi, security, and building end-to-end Web3 products.

PROFESSIONAL EXPERIENCE

Accelerated Builder @ Turbin3 | April 2026 – June 2026

- Working on production-grade Solana programs in Rust using Anchor & Magicblock
- Mastering advanced Rust concepts and idiomatic rust practices.
- Integrating third-party protocols (MagicBlock, TukTuk) to build multi-program systems.
- Engaging with mentors , participating in code reviews and architectural discussions

Builder Grad @ Turbin3 | Jan 2026 – March 2026

- Built strong foundations in Rust systems programming and Solana fundamentals.
- Proficient with Anchor, Solana CLI, and Web3.js.
- Developed token, vault, and escrow projects demonstrating DeFi and NFT primitives.

Blockchain Lead @ Elevate IIITN | Aug 2025 – Present

- Led Web3 initiatives at Elevate Club at our university with seminars and workshops.
- Guided members in Solidity, Rust, and Web3 development.
- Led technical development initiatives involving Solidity, Rust, DeFi protocols, and blockchain infrastructure.

EDUCATION

Indian Institute of Informations Technology Nagpur | 2024–2028

Bachelor of Technology in Computer Science and Engineering

Delhi Public School, Jankipuram Lucknow | 2013–2023

- Class XII (CBSE) – 76.6%
- Class X (CBSE) – 91.2%

SKILLS

- Languages:** C++, Rust, Solidity, Python, JavaScript, SQL
- Blockchain:** Solana (Anchor), EVM, Cross-chain systems, DeFi primitives
- Cloud & DevOps:** AWS (S3, EC2, Lambda), Docker, Kubernetes, CI/CD, Git
- ML:** PyTorch, Transformers, Embeddings
- Tools:** Linux, CMake, Foundry, LiteSVM, Magicblock

PROJECTS

Sentra - On-Chain Portfolio Risk Engine for Solana (Rust | Cross-chain)

- Built on Solana using Value at Risk (VaR) to calculate real-time portfolio risk.
- Stores risk data immutably on-chain for continuous monitoring.

Rebind - Recovery infrastructure for compliance-restricted real-world assets (Solidity)

- Enables secure wallet rebinds to an existing verified identity after key loss.
- Builds on-chain recovery infrastructure for compliant asset ownership.

DigiPramaan - Document Processing & Upload Optimization Engine (Web2)

- Extracts structured data and optimizes document images for storage.
- Provides field-level confidence scores and automated verification reports.

Kairos - Real-time options trade timing intelligence engine (Python)

- Analyzes market and option data to identify efficient entry opportunities.
- Scores option contracts based on timing, volatility, liquidity, and market conditions.
